

Java

```
class Solution {  
    public int longestCommonPrefix(int[] arr1, int[] arr2) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} arr1  
 * @param {number[]} arr2  
 * @return {number}  
 */  
var longestCommonPrefix = function(arr1, arr2) {  
  
};
```

TypeScript

```
function longestCommonPrefix(arr1: number[], arr2: number[]): number {  
  
};
```

C++

```
class Solution {
```

```
public:
    int longestCommonPrefix(vector<int>& arr1, vector<int>& arr2) {

    }
};
```

C#

```
public class Solution {
    public int LongestCommonPrefix(int[] arr1, int[] arr2) {

    }
}
```

Kotlin

```
class Solution {
    fun longestCommonPrefix(arr1: IntArray, arr2: IntArray): Int {

    }
}
```

Go

```
func longestCommonPrefix(arr1 []int, arr2 []int) int {

}
```
